XPELAIR is imported and distributed by ACTOM Group, which offers a wide range of domestic XPELAIR extractor fans for bathrooms, showers, toilet cubicles, smoking rooms, domestic and industrial kitchens, etc.

XPELAIR is a market leader with more than 70 years experience in the industry and offers high quality window, wall, ceiling, ducted and in-line fans to suit any ventilation requirement.

Domestic Ventilation Introduction

XPELAIR offers different fan variations suitable to be mounted on the ceiling, windows or walls for extraction purposes.

Extraction is necessary in rooms where ventilation is poor and stale or stagnant air needs to be eliminated and replaced with fresh air.

**STEP 1:**
The first step in selecting the correct extractor fan is to decide where the extraction fan needs to be mounted: (through the ceiling, through the window or through the wall?)

**STEP 2:**
The next step is to establish what the VOLUME of the room is, from which the fan must extract.
**E.g.** Bathroom of 2.7m Height, 4m Wide, 3m Long = 2.7m x 4m x 3m = 32.4m³

**STEP 3:**
Now that you have established what the VOLUME of the room is, you need to decide how many times per hour the fans needs to replace the air. In other words, how many air changes are necessary to ventilate the room sufficiently.

Use the below table to determine how many air changes will be required:

<table>
<thead>
<tr>
<th>Air Change Guide (per hour):</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bathroom: 10 - 15</td>
</tr>
<tr>
<td>Toilet: 10 - 12</td>
</tr>
<tr>
<td>Laundry: 15 - 20</td>
</tr>
<tr>
<td>Bedroom: 8 - 10</td>
</tr>
<tr>
<td>Domestic Kitchen: 15 - 20</td>
</tr>
<tr>
<td>Ind. Kitchen: 20 - 30</td>
</tr>
<tr>
<td>Offices: 12 - 15</td>
</tr>
<tr>
<td>Smoking Room: 25 - 30</td>
</tr>
</tbody>
</table>

Use this formula to select the fan that you require.

**E.g.** \( L \times W \times H = m^3 \times \text{Air changes required} = m^3 \text{ per hour} (m^3/h) \text{ required}.\)

Use this catalogue to select the fan that meets your satisfaction - mounting, style, type and performance of the unit.

**Please note:** that it is VERY important that there is always fresh air coming into the room freely (through a door grille, open windows, space underneath the door, etc.) in order for air to be extracted.

Failing to ensure that there is a supply of fresh air into the room may cause the fan motor to fail and even burn out.

The extract point should always be located as high as possible and provide a flow across the room with air replacement usually coming from the doorway.

**Axial vs Centrifugal?**

Axial fans are most appropriate for extraction directly to the outside through a wall or window. However, if the window or wall faces a prevailing wind such as in coastal areas, exposed hills or high rise applications, a centrifugal fan, which has a higher pressure performance, is more suitable to overcome these outside conditions. Centrifugal fans are ideal for flexible ducted applications or smooth more ducting for longer distances.

**Safety:**

XPELAIR fans are all rated IP55, which means that these fans are weather proof but not “hose proof”. The fans can withstand droplets of water and wind but are not waterproof and should not be submerged. All XPELAIR fans carry a one year warranty, provided that the fans are correctly installed and according to the specifications.
**DX100 Range - 100mm Axial Extract Fan**

Other options available in the Simply Silent range includes pullcord, timer, humidistat & PIR versions.

**Key Features**

**Type:** Axial extract fan.  
**Application:** Domestic bathrooms, shower rooms & toilets.  
**Hole diameter:** 115mm (wall)  
125mm (window)

**XPELAIR DX100**

Stylish, compact and easy to install single speed fan, suitable for a wide range of domestic applications including bathrooms, shower rooms and toilets. DX100 has a softly curved flowline grille design which will blend into wall or ceiling decor, whilst the shallow depth of the outlet spigot ensures compact window installation.

The fan is supplied complete with an universal mounting kit (wall tube, gasket x 2, outer grille, skirt moulding for window) suitable for wall, ceiling and window mounting (in single glazing up to 6mm) applications.

The DX range includes an air operated backdraught shutter, outer grille and ducting. Control options include standard and timer. All models are IP55 rated. Suitable for 220V-240V 50Hz mains operation. Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

**DX100 Range - 100mm Axial Extract Fan**

**Models**

**DX100 Ref. 90839AW**
- Single speed axial unit.
- Operated by a remote switch. In a bathroom normally a separate pull cord or the lighting circuit.
- Includes universal mounting kit.
- Colour: white.

**Controllers**

**Remote Humidistat XRH**
Ref. 21856AW
- Stand alone humidistat switches fan On/Off when RH reaches preset levels. Complete with pull cord override switch.

**Time Delay Unit DT20**
Ref. 21850AW
- User adjustable run-on timer. (2-20 mins) Passive Infrared Sensor XPIRA Ref. 21871AA.
- Activates fan via body movement, ideal for infrequently used public spaces. Built-in timer to prevent nuisance tripping.

**XPELAIR DX100**

The DX100 extract fan range is designed for those looking for something conventional, with a modern twist. These fans control humidity, odours and mould growth effectively in bathrooms, shower rooms, cloakrooms, toilets and kitchens.

The DX100 range features a more conventional square grille-style fascia, finished in cool white.

The DX100 range has two speeds, selectable at install, and features a wall-fitting kit.

Choose to include a run-on timer that is fully adjustable when installed (this can be set from 30 seconds to 30 minutes, once the unit is switched off), a pull cord for on demand operation, or a timer and built-in humidistat to regulate humidity automatically.

LV100S - Silent Fan

Key Features

Type: Axial extract fan.
Application: Bathrooms, shower rooms, cloakrooms, kitchens & toilets.
Actual size: 178.5mm(W) x 178.5mm (H)
Mounting: Wall & ceiling.

The LV100 (Low Volt) standard models are designed specifically for safe installation directly in or over the splash area zone 1, offering complete peace of mind. This model is supplied with a 12V SELV transformer and wall kit consisting of a wall sleeve and outer louvre grille. The LV100S has two speeds, selectable at installation.

C4S Range - Silent Fan

**Key Features**

**Type:** Axial extract fan.

**Application:** Bathrooms, shower rooms, cloakrooms, kitchens & toilets.

**Actual size:** 180mm(W) x 180mm(H)

**XPELAIR C4S**

The C4 Contour range effectively eliminates humidity, condensation and odour to improve air quality. Suitable for wall, ceiling and panel and window fitting. The C4 range has two speeds, selectable at installation.

Near-silent minimises disturbance from noisy bathroom fans for a peaceful night’s sleep.

Fan is fitted with a 100mm dia. impeller. Each stylish fascia blends with the surrounding decor, and can be removed with ease for cleaning.

The C4S is suitable for safe installation in a bathroom, fan is rated IPX4.

### XPELAIR DX150S

The DX150S - 2 speed extract fan is designed for those looking or something conventional, with a modern twist. This fan controls humidity, odours and mould growth effectively.

Fan is fitted with a 150mm dia. impeller and is complete with back draught shutter.

Ancillaries include a fixed outer grille (CFWG150) or an air operated louvre (XLG150).
The XPELAIR VX range of single speed axial fans are compact and easy to fit for domestic applications. The fan grilles are very modern and discreet.

These fans are suitable for a wide range of applications including bathrooms, shower rooms and toilets.

The XPELAIR VX fans are suitable for wall mounting as well as ceiling mounting, but it cannot be window mounted.

The one piece construction of these fans make installation very simple and lowers the risk of fan vibration.

All VX models are IP55 rated. They are all suitable for 220-240V 50Hz mains operation and class B insulation for operation in ambient temperatures of up to 40°C and are fitted with a thermal cut out.

Premier range of centrifugal fans are designed for domestic applications, where longer duct runs are required. All models have a gloss white casing with a clean and sleek appearance.

A two part casing means Premier fans can be recess or surface mounted. All models feature an automatic air operated back draught shutter.

The clip-off front cover and removable fan blade on all models allow easy cleaning and maintenance. All models also have a neon indicator.

DX 200 fans are IP55 rated. Are all suitable for 220V – 240V AC 50Hz mains operation. Motors are totally enclosed and maintenance free for life, with self-aligning bearings and a thermal cut out.

All electronics and wiring terminals are fully protected.

The DX200T also has a mechanical trickle ventilation facility.
PREMIER DX200 & DX200T Range - Centrifugal Fans

**Models**

**DX200 Ref. 91013AW**
- High performance centrifugal unit.
- 2 Speeds.
- Colour: white.
- Wall & ceiling mount.

**DX200T Ref. 91014AW**
- High performance centrifugal unit with timer.
- Built-in run-on period after light switched off.
- User adjustable from 30 sec - 20 mins.
- Colour: white.
- Wall & ceiling mount.

**Controllers**

**Remote Humidistat XRH Ref. 21856AW**
- Stand alone humidistat switches fan On/Off when RH reaches preset levels. Complete with pull cord override switch.

**Time Delay Unit DT20 Ref. 21850AW**
- User adjustable run-on timer (2-20 mins).

**Passive Infrared Sensor XPIRA Ref. 21871AA**
- Activates fan via body movement, ideal for infrequently used public spaces. Built-in timer to prevent nuisance tripping.

**Dimensions (mm)**

**Installation and Accessories**

Wall mounting
- Flush wall mounted
  - Hole diameter: 117mm
  - Ducting size: 100mm

Ceiling mounting with flat ducting
- Hole diameter: 117mm [(W) 203mm x (H) 233mm (flush mounted)]
- Ducting size: 100mm
SHOWER FAN Range - 100mm In-line Fan

Key Features

**Type:** In-line single speed axial extract fan & system.  
**Application:** Domestic toilets, bathrooms & shower rooms.

**XPELAIR Shower Fan**

The Xpelair Shower Fan (BX100C) is designed to extract condensation laden air directly from above the shower, whilst bathing the cubicle in warm light.

The kits include everything needed for a standard installation including a stylish ceiling inlet complete with bezel and 12V 50W sealed lamp, an in-line extract fan, 12V safety low voltage transformer, flexible ducting (100mm dia.) and a wall grille.

These fans are suitable for shorter duct runs (3m duct supplied) in shower cubicles, bathrooms and toilets.

All fans are IP55 rated and suitable for use with supply voltage of 220V-240V 50Hz.

The fan motor is sealed for life maintenance free and is fitted with safety thermal overload protection.

GX Range - Window / Surface Wall Fans

Key Features

Application: Pubs, restaurants, offices, kitchens, factories, schools & shops.

Control options: for 9” & 12”

Humidity: XRH controller

Movement: XPIRA

Speed: FR22/30 single fan (2 speeds)

EC6 group controller (variable speed)

Time delay: DT20

XPELAIR GX6

The Xpelair GX6 models are designed for use in kitchens and utility rooms and can be window or panel mounted. Bathroom surface wall mounted using optional extra long ladder strips. (2 for GX6, 3 for GX9, 4 for GX12).

A tamper-proof positive plug and socket assembly provides a means of isolation for service access.

Installation in a 25mm window or panel using standard metal ladder strips.

If installed in panels or walls thicker than 25mm, then use GXL20/50 extended ladder strips to enable connection of outer grille to inside of fan.

Both the GX9 and GX12 models are reversible and feature a totally enclosed external rotor motor providing constant volume outputs, even in gusty weather.

Pre-balanced impellers eliminate “fan judder” and ensure quiet trouble free operation. Sealed for life maintenance free bearings ensure suitability for running at any angle. Running costs are impressively low, and when not in use the silent electro-thermal shutter cassette closes silently against backdraughts.

All models are and suitable for 220V-240V 50Hz mains operation.

Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

WX Range -
Flush Wall Mount Fans

Key Features

**Application:** Pubs, restaurants, offices, kitchens, factories, schools & shops.

**Control options:** for 9” & 12”

**Humidity:** XRH controller

**Movement:** XPIRA

**Speed:** FR22/30 single fan (2 speeds) EC6 group controller (variable speed)

**Time delay:** DT20

**WX6, WX9, WX12**

Suitable for installation into double brick walls. The wall hugging, low profile white fascia is styled to blend in cleanly with surroundings.

For safety, a finger guard is integrated into the ultra slim high gloss ABS fascia and the exterior wall grille design.

On WX9 and WX12 units, a positive plug socket assembly provides a means of isolation for service access without the safety risk of accidental disconnection.

All WX models come complete with a wall mounting kit which includes a wall liner.

Both the WX9 & WX12 are reversible (not 6”) and now feature totally enclosed external motors providing constant volume outputs.

Sealed for life maintenance free bearings, running costs are impressively low and when not in use the silent electro-thermal shutter cassette closes silently against back draughts.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation.

Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

PX Range - Ceiling Mount Fans

Key Features

**Type:**
Commercial duty ceiling and panel mount axial ventilation unit.

**Application:**
Kitchens, restaurants, pubs, offices, schools, shops & kiosks.

**Control options:**
for 9” & 12”

**Duct size:**
- PX6: 200mm dia.
- PX9: 250mm dia.
- PX12: 315mm dia.

**PX6, PX9 & PX 12**

The PX range introduces a greater flexibility into the design of commercial and larger domestic ventilation systems. They can be installed at any angle in ceilings, voids and wall panels of any thickness.

An integral spigot allows the attachment of flexible ducting. Both the PX9 and PX12 fans are reversible, making them ideal for ducted input systems.

They also feature totally enclosed external rotor motors, providing constant volume outputs even in gusty weather.

Pre-balanced impellers eliminate “fan judder” and ensure quiet trouble free operation. Sealed for life maintenance free bearings ensure suitability for running at any angle.

Running costs are impressively low, and when not in use the silent electrothermal shutter cassette closes silently against backdraughts.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation.

Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

CX10 Range - Ceiling Mount Fan

Key Features

Type: Ceiling mount axial fans.
Application: Domestic kitchens, bathrooms & shower rooms.

XPELAIR CX10
Ref. 90209AB

The ceiling mount CX10 is suitable for domestic kitchens, larger utility rooms and shower rooms.

Light commercial applications include change rooms, smoking rooms, offices, etc.

The CX10 is suitable for short duct runs, high humidity areas. The flush design is fitted with finger guard projection. The grille clips off for easy cleaning.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation.

Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

- Single speed axial ceiling fan unit is operated by a remote switch.
- Complete with integral finger-guard and fly screen.
- Lightweight two piece construction suitable for steam and condensation applications.
- Colour: white.
- Can be ducted using 200mm flex ducting.
- Do not duct for longer than 3m.

Ceiling Mounting

Impeller dia.: 250mm
Hole dia.: 300mm
Ducting size : 200mm

Note: do not window or wall mount.

CMF Range - Ceiling Mount Fan

Key Features

Type: Ceiling mounted centrifugal fans.
Application: Domestic kitchens, bathrooms & shower rooms.

CMF
The ceiling mount CMF fans are suitable for domestic applications that require a longer length of ducting.

The CMF fans are centrifugal type fans and are designed to handle pressure in a ducted application.

All models are suitable for high humidity applications and have an unobtrusive flush design with fingerguard protection.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation.

Class B insulation for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

XID Range - In-line Duct Fan

Key Features

- **Type:** Metal in-line.
- **Application:** Commercial/industrial.
- **Control options:** Speed control & humidity/PIR sensing.
- **Speed control:** XIC1 controller
- **Humidity:** XRH
- **Movement:** XPIRA
- **Time delay:** DT20

## XPELAIR XID Range

In-line duct systems have grown in popularity as a method of concealed ducted ventilation over the past two decades. The Xpelair XID in-line range is engineered for trouble free operation and delivered complete with adjustable mounting bracket.

The fans are ideal for ducted applications in shops, schools, factories, pubs, toilets, kitchens, etc. The range is manufactured in zinc coated corrosion resistance sheet metal with 30mm long spigot connections for ease of connection to duct work.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation and suitable for operation in ambient temperatures up to 40°C and are fitted with a thermal cut out.

**Installation**
XIDP Range - Plastic Centrifugal In-line Fans

**Key Features**

**Type:** Plastic in-line.

**Application:** Commercial/industrial.

**Control options:** Speed control & humidity/PIR sensing.

**XPELAIR XIDP Range**

Centrifugal in-line fans provide the ideal ventilation solution for many exposed and high humidity applications.

The Xpelair XIDP range is suitable for application where the unit will be seen – in wet areas such as kitchens, shower areas and a wide range of commercial situations. The XIDP range is based on the proven XID external rotor motor and backward curved impeller units to provide a range of high performance plastic in-line fans. Available in 100mm - 315mm dia.

The moulded casing is designed to provide the best possible bell mouth entry, guide vanes and outlet.

The wall thickness provides sound insulation and will not corrode.

The casing is both impact and fire resistant and a mounting foot is provided for fast and easy installation.

All models are IP55 rated and suitable for 220V-240V 50Hz mains operation and suitable for operation in ambient temperatures up to 40°C and are fitted with a thermal overload protection.

XIM Range - Plastic Mixed Flow Fans

Key Features

Type: Plastic in-line.
Application: Commercial/industrial.
Control options: Speed control & humidity/PIR sensing.

Speed control: XIC1
Humidity: XPI RA
Movement: XRH
Time delay: DT20

XPELAIR XIM Range

Traditionally centrifugal ducted systems have been bulky and noisy but not any more.

The new low profile Xpelair XIM units provide plenty of useable power for domestic ducted applications and save space too.

These models are ideal for ducted applications where space is limited such as bathrooms, shower rooms, kitchens and other internal rooms without opening windows.

All models come complete with a convenient mounting cradle.

They are dimensionally smaller than centrifugal units and with lower sound levels these units can often eliminate the need for a silencer.

The plastic construction will not deteriorate in high humidity conditions. All models are IP55 rated. They are double insulated and suitable for 220V-240V 50Hz mains operation and suitable for operation in ambient temperatures up to 40°C and are fitted with a thermal overload protection.

XIM Range - Plastic Mixed Flow Fans

Key Features

XIM100+ / 125 / 150 / 200
Ref. 91245AW

- High performance 2 speed in-line plastic fan.
- Mixed flow impeller/ guide vanes.
- Integral mounting cradle.
- Rated IPX4.
- Supply voltage: 220-240V 50Hz.

Controllers & Accessories

Wall Grille CFWG
CFWG100 White Ref: 89742AW
CFWG150 White Ref: 89857AW
- Surface mount exterior wall outlet grille.
- For use with 100mm/150mm nominal size ducting.
- Fixing screws provided.
- Use with: 100mm axial variants.
- CFWG100: (W) 150mm x (H) 150mm x (D) 13mm.
- CFWG150: (W) 217mm x (H) 217mm x (D) 24mm.

XLG Air Operated Louvre Shutter
Ref: 89691AA
- Air operated louvre shutter for 100mm, 125mm, 150mm, 200mm, 250mm, 315mm dia. fans.
- For outside of wall.

GXL 20/50 Ladder Strips
Ref: 89383AA
- Used when installing GX fans through walls.
- Length: 508mm.
- Easy to cut to size required.
- 6" = 2 strips.
- 9" = 3 strips.
- 12" = 4 strips.

Wall Vent Kit VK10
Ref: 89120AW
- To bridge a cavity or line a solid wall hole.
- Complete with wall duct (WD), 155mm square external backdraught shutter, foam strip and wall fixings.
- Dimensions: (W) 155mm x (H) 155mm x (D) 201mm.

XIC1 Controller
Ref: 21858AW
- XID Fan Controller for use with XID, XIM & XIDP fans.
- Slide switch provides: On/Off.
- Adjustable control for infinitely variable speed.
- Power ‘On’ indicator light.
- Surface or recess mounting.
- Colour: white.
- Dimensions: (W) 160mm x (H) 86mm.

Door Grilles
Ref: 89529AA (white) Ref: 89530AA (brown)
- Tight closing bathroom/toilet doors prevent air circulation to the fan. Air replacement door grilles permit air to flow into the room with the door shut.
- Slimline design.
- Consists of two grilles and fixings.
- Minimum door thickness of 35mm.
- Dimensions: (W) 453mm x (H) 90mm.
- Aluminium door grilles made to order also available.

GX Wall Kit WK
For GX6, 9 & 12 Models
- For bridging cavity walls or lining solid double brick walls.
- Steel wall liner length: 280mm.
- Set of 508mm ladder strips.

SP Spigot Plate
- Available in 100mm dia. duct, 125mm, 150mm, 200mm, 250mm, 315mm.
- Attach to ducting and inner wall.
Controllers & Accessories

FR22 / 30 Single Fan Controller
Ref: 21868AW
- Sliding Switches.
- On/Off.
- 2 Speeds: low- high speed.
- Extract – intake airflow.
- Power “on” indicator.
- For surface/ recess mounting.
- Supply Voltage: 220V – 240V.
- Colour: gloss white.
- Use with: GX9, GX12, WX9, WX12, PX9, PX12.
- Dimensions: (W) 210mm x (H) 86mm x (D) 41mm

XRH Humidity Sensor
Ref: 21856AW
- Stand alone humidistat switches on when RH rises to preset level and off when it declines (50-90% RH).
- Fan operation indicator light.
- Pullcord operated override switch.
- Surface or recess mounting.
- Colour: white.
- Supply voltage 220 - 240V 50Hz.
- Use with all fans.
- Dimensions: (W) 160mm x (H) 86mm x (D) 45mm

EC6 Variable Speed Controller
Ref: 21854AW
- Can control up to six 9” or four 12” fans.
- Sliding switches and speed control knob.
- On/Off.
- Variable speed control.
- Extract – intake airflow.
- Power “on” indicator.
- For surface/ recess mounted.
- Supply voltage: 220V – 240V.
- Colour: gloss white.
- Use with GX9, GX12, WX9, WX12, PX9, PX12.
- Note: Do not mix fan sizes.
- Dimensions: (W) 160mm x (H) 68mm x (D) 45mm

DT20 auto Time Delay Switch
Ref: 21850AW
- Overrun time delay switch 2-20 minutes.
- Usually connected to the lighting circuit.
- Fan switches On with the light.
- Provides continued ventilation run-on period after the light has been switched off.
- Surface or recess mounting.
- Colour: white.
- Supply voltage 220-240V 50Hz.
- Use with all fans.
- Dimensions: (W) 100mm x (H) 86mm x (D) 45mm
- Amp. inductive load 2.5A @ 240V AC.

XPIRA Passive Infrared Movement Sensor
Ref: 90219AW
- Position to switch the fan on when body movement is detected. Ideal for infrequently used public spaces.
- Built-in run-on timer.
- For indoor use only.
- Use with all fans.
- Dimensions: (W) 86mm x (H) 86mm
P.O. Box 678, Germiston, 1400, South Africa.
